PROFESSIONAL SUMMARY

Full-Stack Software Developer (MCA candidate) with hands-on experience building **Java** and **Spring Boot** backend systems, including RESTful API design, **JSON Web Token (JWT)** authentication, and **Role-Based Access Control (RBAC)**. Skilled in **MySQL**, **PostgreSQL**, **Spring Security**, and **Clean Architecture** within Agile/Scrum SDLC. Additional experience in **Flutter** mobile development and cross-platform full-stack integration. Strong foundation in **OOP**, **DSA**, and secure coding practices.

TECHNICAL SKILLS

Languages & Core Concepts	Java, Dart, Python, C, C++, OOP, Data Structures & Algorithms (DSA), Clean Architecture, SDLC, Agile/Scrum, Secure Coding, Code Review, Unit Testing
Backend & Database	Spring Boot, RESTful API Design, JWT Authentication, RBAC, CORS Configuration, Session Management, PHP (OOP), MySQL, PostgreSQL, CRUD Operations
Tools & Platforms	Git, GitHub, Postman, Android Studio, VS Code, XAMPP
Mobile & Frontend	Flutter (Android Mobile, Android TV, Fire TV), Cross-Platform UI Development, Widget-Based Architecture, Provider State Management, Flutter DevTools, HTML5, CSS3, JavaScript, Responsive Web Design, Material Design

WORK EXPERIENCE

Flutter & Spring Boot Developer Intern | *RGreen Technology, Madurai* Dec 2025 – Jun 2026

- Shipped 3+ production-grade Flutter modules for a live Android application, integrating 8+ RESTful API endpoints and collaborating closely with the backend team on API contracts and data flow.
- Converted Figma designs into pixel-accurate UI, debugged 15+ rendering bugs using Flutter DevTools, and refactored 10+ widgets into reusable components within Agile/Scrum sprints.

PROJECTS

Media Jungle — Full-Stack OTT Streaming Platform

Tech Stack: *Flutter, Dart, Spring Boot, PostgreSQL, JWT, REST API, Git*

- Integrated 10+ backend services — including authentication, subscriptions, payments, and notifications — via RESTful APIs built with Spring Boot, implementing JWT-based login, Spring Security, and role-based access control.
- Built a cross-platform OTT streaming app for Android Mobile and TV using Flutter, featuring a video player, playlists, watchlist, and custom D-pad navigation via FocusManager for TV.

Online Movie Ticket Booking System

Tech Stack: *PHP, MySQL, Git*

- Developed a full-stack movie ticket booking platform using PHP and MySQL, implementing session-based authentication with bcrypt password hashing and prepared statements to prevent SQL injection.
- Built an interactive seat booking grid with real-time availability and an admin dashboard for full CRUD management.

Online Bookstore — Full-Stack E-Commerce Platform

Tech Stack: *PHP, MySQL, HTML, CSS, JavaScript, XAMPP, Git*

- Co-developed a full-stack bookstore platform with user/admin modules for book search, categories, wishlist, and cart.
- Designed system architecture using Data Flow Diagrams (DFDs) and an Entity-Relationship (ER) diagram, implementing checkout, order tracking, and secure login.

EDUCATION

Master of Computer Applications (MCA) **CGPA: 7.6/10.0** Jul 2024 – May 2026
Mepco Schlenk Engineering College, Sivakasi

Bachelor of Science in Computer Science (B.Sc. CS) **CGPA: 7.2/10.0** Jun 2021 – Apr 2024
Sourashtra College, Madurai

CERTIFICATIONS & TRAINING

- | | |
|--------------------------------------|--------------------------------------|
| • Embedded Firmware Design | <i>Bharath Semiconductor Society</i> |
| • Java (Basic) Certificate | <i>HackerRank</i> |
| • Programming in Java | <i>NPTEL</i> |
| • Artificial Intelligence Foundation | <i>Infosys Springboard</i> |
| • C and C++ Programming | <i>SSI Institute</i> |
